<b>Office Action Summary</b>	<b>Application No.</b> 10/519,043	<b>Applicant(s)</b> KENDALL, SCOTT ALLAN	
	<b>Examiner</b> SAHAR A. BAIG	<b>Art Unit</b> 2424	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

### DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/20/2008 has been entered.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 3, 4, 7, 8, 10, 11, 14, 15, 17, 18, and 21 rejected under 35 U.S.C. 103(a) as being unpatentable over Thibadeau et al. (US Patent No. 5,565,909) in view of Lemelson et al. (US Patent No. 6,084,510).

Regarding Claim 1, 3, 8, 10, 15, and 17, Thibadeau discloses a method for controlling a television signal receiver having an emergency alert function with an associated setup process, said setup process comprising **[Col. 3 lines 35-40]**: receiving an input representing a geographical area; and providing a predetermined output when a distance between a reference point and a predetermined point associated with said geographical area exceeds a

Art Unit: 2424

predetermined distance **[Col. 10 lines 35-45]**. Thibadeau discloses that the reference point corresponds to a location of a transmitter which transmits emergency alert signals **[Col. 8 lines 8-10]**. However Thibadeau fails to teach of the transmission range of the transmitter corresponds to the predetermined distance. In analogous art, Lemelson discloses an emergency response system wherein radio receivers and TV sets can be equipped with GPS receivers to receive GPS signals or, alternatively, have their location coordinates determined by other conventional devices, such as, radio ranging systems, optic systems, or the like, entered by users **[Col. 10 lines 40-60, note signals are received within the range of the station]**. Therefore it would have been obvious to one of ordinary skill in the art to combine the teachings of Thibadeau and Lemelson to develop an emergency broadcast system capable of computing the distance range from the transmitting site to the user.

Regarding Claim 2, 9, and 16, Thibadeau fails to explicitly teach the use of FIPS location code. Federal Information Processing Standards (FIPS) are publicly announced standards developed by the United States Federal government for use by all non-military government agencies and by government contractors. To include this feature would have been obvious to one of ordinary skill in the art.

Art Unit: 2424

Regarding Claim 4, 7, 11, 14, 18, and 21, Thibadeau discloses the said reference point to be a center point of said other geographical area **[Col. 13 lines 63-64; Region 302 is the region surrounding the location of interest 304.]**

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. It includes Desch US Patent No. 6,078,260.
